Summary

B.Tech Computer Science student skilled in **full-stack development** with expertise in **React.js, Node.js, Express.js, Flask, and MongoDB**. Built projects like a **Career & Course Recommendation System** and **Sales Forecasting Web App**, and seeking an **entry-level Full-Stack Developer role** to create impactful web solutions.

Education

Rungta College of Engineering & Technology Bhilai, CG

Bachelor of Technology in Computer Science *2022-2026*

Specialization in Data Science - 65%

Central Hindu School Gorakhpur, UP

Intermediate [PCM] - 70% *- 2022*

Highschool - 89% *- 2020*

Technical Skills

Programming Languages: Python, Java

Frontend: HTML, CSS, JavaScript, React.js

Backend: Node.js, Express.js, Flask, FastAPI

Database: PostgreSQL

Machine Learning / NLP: Scikit-learn, spaCy, NLTK

Tools & Platforms: Git, GitHub, Jupyter Notebook, VS Code, Google Apps Script, Google Sheets API

Other Skills: Data Structures and Algorithms (Java), Microsoft Office

Experience

1. **Web Developer Intern** (Onsite) Jan 2026 – Present
   Botivate Services LLP *Raipur, CG*
   - Developed type-safe React.js and TypeScript applications, optimizing performance through efficient state management and REST API consumption.
   - Engineered custom automation using Google Apps Script and Sheets, creating real-time data sources for dynamic frontend dashboards.
   - Built reusable components and bridge services within the Google Workspace ecosystem to streamline data handling and internal tool deployment.

2. **Web Developer Intern** (Remote) Dec 2025 – Jan 2026
   iTechnoPad *Pune, MH*
   - Developed full-stack web features using React, Python, and PostgreSQL.
   - Built and integrated REST APIs with efficient database operations.
   - Implemented business logic and reusable UI components following scalable design practices.

Projects

1. **Career & Course Recommendation System** **(Github)**

Tech Stack*: React.js, Node.js, Express.js, Python, FastAPI, spaCy, Scikit-learn*

- Developed a **resume-driven career and course recommendation system** using a Node.js + Python (FastAPI) microservice architecture, leveraging **spaCy-based NLP for skill extraction** and a **context-aware ranking engine** to identify skill gaps and deliver personalized learning paths and career roadmaps via a React dashboard.

2. **Movie Explorer** **(Github)**

Tech Stack: *React.js (Vite), React Router DOM, Context API, OMDb API, CSS3*

- Engineered a **responsive React.js movie exploration platform** with debounced search, dynamic routing, pagination, and global state management (Context API), integrating the OMDb API and LocalStorage to deliver a performant, cinematic UI-driven user experience.
